Location: Jaora, Madhya Pradesh

Email: bhattruchi458@gmail.com

Mobile: 8982356572

Technical Skills

Languages: Java, Python, HTML, CSS

Development: Machine Learning, Software Development, Problem Solving

Tools: Visual Studio Code, TensorFlow, Jupyter, Git, Eclipse

Databases: MySQL

Education

Vellore Institute of Technology University, Bhopal

B.Tech in Computer Science (AIML)

Sep 2022 – Expected May 2026

GPA: 8.17

Projects

Panoptic Image Segmentation

- Engineered a deep learning-based image segmentation pipeline using PyTorch and Detectron2, achieving a 15% improvement in pixel-wise accuracy compared to Mask R-CNN models.
- Enhanced automation of object recognition tasks, making the system more adaptable for real-world computer vision applications.
- Tools Used:** Detectron2, Matplotlib, PyTorch

Financial Factors and Analysis

- Evaluated financial performance indicators including revenue growth and customer acquisition cost to identify three critical risk factors.
- Delivered actionable insights that can support decision-making in investment and risk management.
- Tools Used:** VS Code, Python

Tiffin Ease

- Developed TiffinEase, a web-based platform that connects off-campus students with local tiffin providers to access affordable home-cooked meals while helping vendors optimize demand and reduce waste.
- Improved vendor efficiency by reducing food wastage through ML-powered predictive meal planning and personalized student recommendations.
- Tech Stack: React.js, HTML, CSS, JavaScript (frontend), Figma (UI/UX), SQLite (database), PyTorch (ML), OpenAI API (smart insights).

Achievements

- Secured ELITE certificate in NPTEL (Privacy and Security in Online Social Media)
- Membership Coordinator – Data Science Club
- Participated in Various Hackathons (GrabHack: Campus Edition, IdeationX 2.0, etc.)
- 100 Days of LeetCode Challenge – Consistently practiced algorithmic problem-solving, focusing on dynamic programming, graphs, and advanced data structures.

Certificates

AWS Solutions Architect

Computer Vision

Machine Learning

SQL and Python
